

МАТЕМАТИЧЕСКИЙ СБОРНИК
Том 118 (160) (1982), вв. 1-4
MATHEMATICS OF THE USSR-SBORNİK
Volume 46, Numbers 1-4, 1983

AUTHOR INDEX

Aleksandrov, A. B. <i>The existence of inner functions in the ball</i>	143
Azamov, A. <i>On Pontryagin's second method in linear differential games of pursuit</i>	429
Balashova, G. S. <i>On extension theorems in spaces of infinitely differentiable functions</i>	375
Egorov, Yu. V. <i>Propagation of singularities for solutions of an equation of principal type</i>	527
Fursikov, A. V. <i>Properties of solutions of some extremal problems connected with the Navier-Stokes system</i>	323
Galaktionov, V. A. and Samarskiĭ, A. A. <i>Methods of constructing approximate self-similar solutions of nonlinear heat equations. I</i>	291
——— <i>Methods of constructing approximate self-similar solutions of nonlinear heat equations. II</i>	439
Geĭn, A. G. See Volkov, M. V.	
Gonchar, A. A. <i>On uniform convergence of diagonal Padé approximants</i>	539
Gushchin, A. A. <i>On absolute continuity and singularity of distributions of random fields</i>	161
Il'in, A. M. <i>Asymptotics of the solution of a boundary value problem for Poisson's equation in the exterior of a cylinder and a half-cylinder</i>	183
Khamdamov, A. A. See Satimov, N.	
Khukhro, E. I. <i>On the associated Lie ring of a free 2-generator group of prime exponent and the Hughes conjecture for 2-generator p-groups</i>	571
Koshanov, A. I. <i>A mixed problem for some classes of nonlinear third-order equations</i>	507
Kucherenko, V. V. and Osipov, Yu. V. <i>Asymptotic solutions of ordinary differential equations with degenerate symbol</i>	75
Marenich, A. A. <i>Summation of the values of arithmetic functions</i>	51
Martirosyan, V. D. <i>On the distributivity of lattices of subvarieties of varieties of alternative algebras</i>	119
Mel'nik, V. I. <i>Tauberian theorems with a remainder for Laplace transforms in the plane</i>	417
Molechanov, V. F. <i>Harmonic analysis on pseudo-Riemannian symmetric spaces of the group $SL(2, \mathbb{R})$</i>	493
Ol'shanakiĭ, A. Yu. <i>On the Novikov-Adyan theorem</i>	203
Ospenko, K. Yu. <i>Best methods for approximating analytic functions given with an error</i>	353

- Osipov, Yu. V. See Kucherenko, V. V.
- Piaskarëv, S. I. *Periodic and almost periodic cosine operator functions*..... 391
- Pyt'ev, Yu. P. *Pseudoinverse operators. Properties and applications* 17
- Rakhmanov, E. A. *On the asymptotics of the ratio of orthogonal polynomials. II*... 105
- Rikhsiev, B. B. See Satimov, N.
- Samarskiĭ, A. A. See Galaktionov, V. A.
- Satimov, N., Rikhsiev, B. B. and Khamdamov, A. A. *On a pursuit problem for n -person linear differential and discrete games with integral constraints* 459
- Semënov, Yu. A. *Smoothness of generalized solutions of the equation $(\lambda - \sum_{i,j} \nabla_i a_{ij} \nabla_j)u = f$ with continuous coefficients* 403
- Shvedenko, S. V. *On (H^p, l^r) -interpolation sequences in the unit disk*..... 473
- Solov'ev, V. N. *On a criterion for convexity of a positive-homogeneous function*.... 285
- Subbotin, Yu. N. *The Lebesgue constants of certain m -dimensional interpolation polynomials*..... 561
- Tavkhelidse, I. N. *An analogue of St. Venant's principle for a polyharmonic equation and applications of it*..... 237
- Tolstonogov, A. A. *On the structure of the solution set for differential inclusions in a Banach space*..... 1
- Volkov, M. V. and Geĭn, A. G. *Identities in almost nilpotent Lie rings*..... 133
- Yafaev, D. R. *Scattering subspaces and asymptotic completeness for the time-dependent Schrödinger equation* 267
- Yakubov, S. Ya. *A nonlocal boundary value problem for a class of Petrovskiĭ well-posed equations* 255
- Zaitsev, A. A. *Equivalence of holomorphically induced representations of Lie groups with an abelian normal subgroup* 171
